Subject: More Training on Microsoft Products for the Unemployed.

Greetings,

My only comment on the recent Microsoft decision is that some of the 1 Billion dollar settlement be put into furthering the educations of the Unemployed. Some of the money should be used to fund more training on Microsoft products at the State level.

As a recent beneficiary of the Unemployment system here in Michigan, I can fully understand the need for more computer training. Oh there is training on Basic use and functions of Microsoft Office, but there isnt any Intermediate and Advanced classes on the use of Microsoft NT, SQL Server, and some of their other products.

Thank you for your time and attention.

Sincerely,

Gerald P. Baj
